

## HOUSE BUILDING TESTIMONIALS

Please note: Whitehead Chartered Surveyors was formed following the merger of WPM and WA

### SHAUN WHITE

Regional Managing Director

We have worked with WPM for a number of years on some large complicated projects. They have provided a wide range of services from Project Management to Quantity Surveying. At all times they have been professional and diligent in the way they have conducted themselves both with our staff and with external organisations they have dealt with on our behalf. Their team have a good wide ranging knowledge base and I would not hesitate in recommending them.

### GARETH HAWKE

Regional Land Director

I have known the team at WPM for approximately ten years and have worked with them on various major important projects in that time, relying particularly on their skills in Project Management and as PQS. In every aspect of what has been asked of them, WPM, impeccably led by Jon Whitehead, have always produced work and results which we have been able to rely upon, and of which they can be justifiably proud. Their approach to work boasts professionalism, integrity and robustness, which is of incalculable value to an organisation like Taylor Wimpey. I have no hesitation in recommending WPM as a consultant able to lead a multidisciplinary team, provide PQS services and add value to any development-led project.

### WILL PHILLIPS

Technical Director

We have worked with WPM for several years and continue to work with them on a number of significant developments. They have undertaken Quantity Surveying and Project Management services. We have dealt principally with Jon Whitehead who leads an exceptionally competent team. We have found them to have an excellent technical understanding of the construction process and contract procurement. They have always acted on our behalf with total professionalism and above all they are extremely personable to work with.

### GARY MCGILLIVRAY

Commercial Director

As Commercial Director of Taylor Wimpey South Wales we have employed the services of WA on a number of key strategic developments within the area. They have undertaken both Quantity Surveying and Project Management duties on these developments in a professional and diligent manner for the overall benefit of the developments. As such, I would have no hesitation in using Nick and his team on future schemes and recommending his services to others.
